

ARMATURES

Electrowelded armatures are a product assembled with wires designed with a triangular structure. Their contact points are joined with electric welds.

CHARACTERÍSTICS

The armature is made with a corrugated top longitudinal wire, two corrugated lower longitudinal wires and two lateral smooth zigzagged wires that join the lower and upper wires.

The strict compliance with NMX-B-455 requirements insure the quality of Magnacero's armatures.

APPLICATIONS AND USES

Commonly used in the manufacturing of assembled half joists and other elements of prefab concrete.

THE MOST COMMON TYPES USUALLY MANUFACTURED ARE:

DESIGN	HEIGHT (cm.)	PIECES PER PACK
10 - 36	12	120
10 - 64	12	120
12 - 36	12	120
12 - 64	12	120
12 - 99	12	60
14 - 36	14	120
14 - 64	14	120
14 - 99	14	60
19 - 64	19	60
19 - 99	19	60
21 - 64	21	60
24 - 99	24	60

Note: Special fabrication up to 35cm in height
